

MR Safety Screening - Hillcrest Stroke Code ONLY

Does the patient have:

1. Pacemaker? Yes / No
2. Spinal Stimulator or Infusion Pump? Yes / No
3. Metal within the eye or brain on CT? Yes / No

If you answered YES to #1-3, Acute Stroke MRI cannot be performed

4. Metal prosthesis (eye, ear, etc)? Yes / No
5. Aneurysm clip? Yes / No

If you answered YES to #4-5, Acute Stroke MRI can be performed on 1.5T system, ONLY if:
-the patient has previously been screened and had MRI at UCSD previously without complication OR
-patient has documentation clip/prosthesis is MR-compatible (vendor card with model #, etc)

6. Does the patient weigh >350 pounds? Yes/No

If YES to #6, Acute Stroke MR can only be performed on the 3T system

7. I attest I have reviewed the head CT and these questions with the patient and/or family.
